

AREDS 2 STUDY COMPARED TO LIFEPAK NANO

	AREDS 2	Lifepak Nano
Lutein	10 mg	10 mg *(equivalent w nano technology 5X absorption)
Zeaxanthin	2 mg	2.5 mg *(equivalent w nano technology 5X absorption)
DHA	350 mg	400 mg
EPA	650 mg	600 mg

*See next page for Nano Technology Absorption Data

Nano Technology Increases Absorption 5 Times

This bioavailability study shows that human intestinal cells absorb over 5 times the amount of coQ10, when it's present in the nano-form, compared to conventional chewable tablet or powder forms. That means that our **30 mg** dosage in NanoCoQ10 **is equivalent to** about **150** mg doses of regular coQ10.

This example is specific for CoQ10, but the carotenoids in Lifepak Nano are also “nanoized” and exhibit the same enhanced absorption as CoQ10.
