

Jungamals® SCS

LifePak® for Kids

Positioning Statement

It's a jungle out there, and the king of kid's vitamins is now stronger to help your children thrive. New from the inside out, Jungamals SCS contains an optimal blend of vitamins and minerals with additional antioxidants to give your child the nutritional building blocks for a healthy, happy life. It's best multivitamin/mineral available for children and parents who are looking for measurable proof that their child's multivitamin is working. Unlike other children's multivitamins, Jungamals SCS has optimal levels of carotenoids that can be measured with the Pharmanex® BioPhotonic Scanner. The new fruity flavor is a kid favorite and the nutrient-packed formula is just what parents want.*

Concept

Studies indicate that a significant portion of children ages 2 to 12 ingest less than the recommended levels of the following nutrients: vitamin E, calcium, iron, zinc, vitamin A, vitamin B₆, magnesium, vitamin D, and vitamin C.

Because children may not be getting the recommended servings of fruits and vegetables and other nutrients in their daily diets, supplementation will help them get all of the nutrients they need. Formulated to supplement a child's daily diet for optimal health in a young, growing body, Jungamals SCS protects and nourishes children with important antioxidants and essential vitamins, minerals, and trace elements.

SCS Certified

You can now see the powerful impact of Jungamals SCS and track the improvement of your child's antioxidant levels using the Pharmanex BioPhotonic Scanner. Measure the difference Jungamals SCS is making in your child's body—we guarantee an increased scanner score and your satisfaction.

Primary Benefits

- Protects young bodies with the antioxidants vitamin C, vitamin E, beta-carotene, lycopene, resveratrol, lutein, zeaxanthin, selenium, and copper.*
- Supports healthy bones by providing calcium and other nutrients necessary for strong, healthy bones.*
